

## Curriculum Vitae – Chen Hui Jing

**Website:** <https://chenhuijing.com>

**Linkedin:** <https://www.linkedin.com/in/huijingchen>

---

### Summary

- \* I am a self-taught designer and developer, based in Singapore.
- \* I believe that great design is timeless, intuitive and aesthetic.
- \* I have learnt that coding standards and best practices are absolutely critical for the long-term success of any software project.
- \* I see teamwork, open communication and compassion as the most key values for working together.
- \* I realised that adaptability, curiosity and humility are the most important qualities to have for succeeding in the tech industry.

---

### Skills

- \* Involved with **web standards** development (predominantly CSS and internationalisation)
- \* Highly proficient in **HTML** and **CSS (either with or without SASS)** for **rapid prototyping** in the browser
- \* Adept in **Javascript** and **Typescript**, as well as version control using **Git**
- \* Prior experience in variety of languages and frameworks for web projects, including **Ruby on Rails**, **Python** (Flask) and **PHP** (Drupal)
- \* Have extensive **public speaking** experience and written **blog posts** for notable web publications like A List Apart, Smashing Magazine and Codrops

---

### Work Experience

#### Interledger Foundation

(Jul 2024 - Jul 2025)

I was the **Chief Operating Officer** at the Interledger Foundation, overseeing the organization's day-to-day operations, implementing strategic initiatives, and driving the Foundation's growth.

- Collaborated with CEO to develop and execute on the Foundation's strategic initiatives and long-term plans
- Worked closely with the Director of Finance to improve the budget management process and enhance communication between the Finance department and respective department leads
- Reworked outdated policies and documented processes and procedures to drive organizational efficiency, scalability and effectiveness
- Drove the IT department to develop stronger IT policies and initiatives, and communicate these effectively with the entire organization

(Jun 2023 - Jul 2024)

I was a **Principal Engineer** responsible for architecting and developing the web properties for the Interledger Foundation and directly collaborating with the CTO on key engineering goals.

- Built and maintained the ILF's open-source, performant and customisable documentation platform to ensure ease of scalability and consistency of organizational branding
- Collaborated closely with the technical writing team to develop a developer experience roadmap which aligns with our organisational strategy
- Developed and deployed v4 of the organisation's public facing website and internal staff portal, ensuring that core stakeholder input was fully accounted for without compromising implementation quality
- Identified technical gaps across the organization and implemented solutions by either building tools internally or delegating tasks to appropriate teams, ensuring efficient resource allocation and operational continuity.
- Played a key role in the engineering department's strategic planning process, contributing to high-level decision-making and aligning technical

initiatives with broader organizational objectives. Collaborated across departments to ensure cohesive execution of organizational priorities.

## **Shopify**

(May 2020 - May 2023)

I was a **Senior Frontend Developer** on the Website Platform team, which worked on Shopify.com and all its regional sites, and later the Partners team, where we worked on the platform for Shopify Partners.

- Spearheaded process improvements for teams working across timezones that resulted in increased efficiency and collaboration on key projects where handover of progress was crucial to our 24-hour development cycle and ensuring alignment across our global team.
- Co-led the ccTLD migration project where code changes across multiple codebases had to be executed, which required coordination and process documentation across 4 different teams. Developed an in-depth migration playbook that allowed non-developers to undertake the process themselves, reducing dependency on developer resources.
- Championed the Partners dashboard home page project which involved coordinating with all the different stakeholders to ensure alignment with business objectives and user needs, crafting the build plan, organising tasks as well as building out the frontend for the home page
- Played a key role in migrating the Shopify.com codebase to a new React-based tech stack to improve scalability and maintainability while minimizing disruption to ongoing operations.

## **Nexmo**

(Sep 2018 - Apr 2020)

As a **Developer Advocate**, I acted as the interface between developer communities and the Nexmo product team to ensure our products provided a great developer experience.

- Built and maintained quick start samples, demos, example apps and other developer productivity tools and enablers
- Wrote blog posts and tutorials, and used social media to share knowledge, request feedback, collaborate and engage with fellow developers
- Contributed to and provided feedback on APIs, SDKs, documentation and product functionality through hands-on development, individual opinion, discussions with the developer community and by organising and running beta/alpha programmes

## **Jewel Paymentech**

(Jan 2018 - Sep 2018)

### **Senior developer**

*(Can provide details on request, omitted for the sake of brevity)*

## **Deep Labs Pte Ltd**

(Mar 2016 - Apr 2017)

### **Front-end engineer**

*(Can provide details on request, omitted for the sake of brevity)*

## **Nurun Singapore**

(May 2015 - Feb 2016)

### **Senior developer**

*(Can provide details on request, omitted for the sake of brevity)*

## **Pixel Onion Pte Ltd**

(Oct 2013 - May 2015)

### **Drupal architect**

*(Can provide details on request, omitted for the sake of brevity)*
